

CONFIDENTIAL DRAFT

Crime Stat Report

Suspect Offender Demographics

UNCLASSIFIED//LES

Overview – This report details the demographics of suspect offenders listed in BPD Case Reports from years 2016 through the end of 2019.

Methodology – Statistics were generated from all BPD Case Reports beginning 2016 and ending in 2019. The data included all identified suspect offenders categorized in Case Reports as “Arrested” or “Suspect/Offender”, along with unidentified suspect offenders listed in Case Reports as “Unknown#(X)”

Case Report Types that potentially had ambiguous relations between a listed suspect offender and an actual crime in Berkeley taking place were omitted. E.g. – 2nd Response, City Incident Documentation, Death Investigation, Disturbance Noise, Missing Persons, Municipal Code Violation, and Outside Agency Report.

Limitations – Data prior to 2016 were omitted due to *possible* inconsistent or systematic changes in reporting practices. E.g. – a query of 2015 data returned only one Case Report with a listed “Unknown” suspect. This may be due to a data merge error or the Case Reports from 2015 predated the existence of the “Unk. Suspects” field entry tab in Case Report submissions.

Additionally, the data is limited to entries submitted through the “Unk. Suspects” field entry tab. It does not include any data entered in the “Free Form Suspect or Vehicle Info” field of the Case Report. I.e. - In some Case Reports, suspect offender descriptions may have been listed in the “Free Form Suspect or Vehicle Info” field, but absent in the “Unk. Suspects” field.

Unstructured Data – Was not able to Query

FREE FORM SUSPECT OR VEHICLE INFO: (leave blank if no one seen; do not use "UNK" or "None")

#1 bma, 20's blk bro, 5'9 - 5'11, 150 lbs, dk skin, blk swtsuit with red stripes around sleeves #2 bma 20's blk bro 5'6 -5'8, 160 lbs gry top, dk pants

Structured Data – Was able to Query

The following slides examine demographics for specific crime types

Identified Suspects

- The data is based on initial investigative reports AND continued case follow-up in which a crime was determined to have occurred and a suspect identity was obtained.
- This may include identifications made by victims, witnesses, officers; and or generated through other investigative leads.

Unidentified Suspects

- The data is based on initial investigative reports in which a crime was determined to have occurred and a suspect description was obtained.
- The suspect description is usually obtained through reporting party, victim, or witness statements.
- It may also be determined by officers' observation of video footage.
- The data does not include any and all case reports in which no description was given or obtained. E.g. – A cold burglary report with no witness or video.
